Backend-focused Full-Stack Engineer | Building production SaaS with async processing, payments, and multi-platform API integrations

EXPERIENCE

Freelance Full-Stack Developer

Sept 2025 – Present

Independent

Remote

- Owned backend development for a trading simulation platform for a Dubai-based client — integrated Trade-Locker APIs, designed the deployment pipeline, and scaled the system to support **1,000+ daily active users** in a 3-engineer team.
- Built and shipped a sports analytics mobile app for a client in 15 days using React Native — delivered production-ready with real-time data visualization and live match tracking.

Software Engineering Intern

Jan 2026 – June 2026

Expora Database Consulting Services (EDCS)

Bengaluru, India

- Developed an internal ticketing and workflow management platform that replaced Jira and other third-party tools, streamlining issue tracking and cross-team collaboration across the organization.
- Built end-to-end full-stack features including authentication, role-based access control, ticket lifecycle management, notifications, and reporting dashboards, delivering a production-ready solution adopted company-wide.

PROJECTS

Social0 — Multi-Platform Social Media Scheduling SaaS — social0.app

Feb 2026 – Present

- Built a **full-stack social media scheduling SaaS** supporting **9 platforms** (Instagram, TikTok, YouTube, LinkedIn, X, Threads, Facebook, Pinterest, Bluesky) with OAuth 2.0 authentication, encrypted token storage, automatic refresh, and unified publishing workflows.
- Designed a distributed publishing architecture using **Cloudflare Queues**, **Cloudflare Workers**, and PostgreSQL event tracking to asynchronously publish posts, process retries, and stream real-time publishing progress to users via Server-Sent Events (SSE).
- Implemented subscription billing with **Dodo Payments**, including webhook verification, plan upgrades/downgrades, entitlement management, and secure payment state synchronization.
- Built a scalable media pipeline using **Cloudflare R2** presigned uploads with platform-specific image processing, validation, and format optimization while integrating Redis-backed background jobs for scheduled tasks and token refresh.
- Tech: React.js, Fastify, TypeScript, PostgreSQL (Drizzle ORM), Upstash Redis, Cloudflare Workers, Cloudflare Queues, Cloudflare R2, Dodo Payments*

SKILLS

Backend: Node.js, TypeScript, PostgreSQL, Redis, REST APIs, WebSockets
Frontend: React.js, Next.js, Tailwind CSS
Infra: Docker, GitHub Actions, AWS (EC2, S3), Cloudflare R2, Vercel
Languages: JavaScript, TypeScript, Python
Tools: Git, Drizzle/Prisma, Postman, Linux

EDUCATION

Bachelor of Engineering, Computer Science

2022 – 2026 (Expected)

KLE Technological University, Hubli

CGPA: 8.47
